### **DETAILED ACTION**

1. This is the First Office Action on the Merits from the examiner in charge of this application.

#### ***Drawings***

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the limitations in claims 13-15 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Objections***

3. Claim 8 is objected to because of the following informalities: “the one or more files are one or more files” is redundant. Appropriate correction is required.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
  2. Ascertaining the differences between the prior art and the claims at issue.
  3. Resolving the level of ordinary skill in the pertinent art.
  4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
6. Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over USP 6,272,727 to Fish.

Fish discloses a filing cabinet, such as shown in Figs 3A & 4A, comprising all the elements recited in the above listed claims including a movable divider 130, a filing cabinet device (134,144) having a projection that extends a distance in front of a top of the movable divider 130, a plurality of files 120, wherein the filing cabinet device can be separate from or integrated with the movable divider, includes a wedge having an angled front forming an angle relative to the movable divider in the range of 30-45 degrees. The differences being that Fish

does not clearly disclose the limitation in claims 10, 13-15, and the method steps recited in the claims.

However, Fish mentioned on column 2 about the dimensions of the filing cabinet device and stated that said device can be of various sizes and shapes; therefore, it would have been obvious and well within the level of one skill in the art to modify the structure of Fish to meet the claimed limitations recited in said claims. Regarding the method steps, since Fish meets all the structural limitations recited therein, it would have been obvious and well within the level of one skill in the art to perform the method steps recited therein.

### ***Conclusion***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. LaBonia, JR. et al, Compton et al, Lee, Rickard, Shuert, Frederick, Schreyer, Riviers, and Sugiyama et al all show structures similar to various elements of applicant's disclosure.
